

INTRODUCING WEST SIDE LUMBER CO. CABOOSE #1

Our Latest joins some of our Greatest! Kits, that is...

WSLco/Swayne Caboose #1 - Kit #PBL-R21

Seen above is WSLco Caboose #1 as constructed by your pal and ours, Jimmy Booth... Isn't it a dandy? A real Modeler's Model, for sure! He elected to "borrow" one of long time Sn3 modeling friend Russ Segnor's "Coal Creek Lumber Company" heralds to use on it 'cause "it just seemed to belong there"... (Thanks Russ!) The West Side painted all their "iron" parts black, their wood parts in the traditional "boxcar red"... 'Makes for a great looking model, doesn't it?

Real West Side modelers will note that Jim used the Swayne caboose window arrangement on his model... The kit has parts to build either caboose accurately...

"Round Roof" Long Caboose - Kit #PBL-R6

Our model of Long Caboose #0503, #0540 and others was introduced back in 1986... With a complete, and we mean COMPLETE interior, this model is still the benchmark by which all other scale models are measured...

COMING SOON/ An ALL NEW 32'-0" SKELETON LOG CAR from ALL NEW TOOLING! With all the bolt and nut detail of their prototypes, we have only two more moulds to cut and these will be ready to ship too!

See our Web Site for more photos & info!

All P-B-L Kits are comprised of accurately detailed, injection molded plastic parts, correctly sized formed wire parts, accurate-per-prototype free rolling trucks with coined metal wheelsets, real Kadee Couplers, correct decals and comprehensive instructions..

"Short" Caboose - Kit #PBL-R11

Like our "Long" Caboose, our "Short" caboose was also tooled here in the U.S. by long time friend Joel Berling... It too has a complete interior... It was introduced back in 1989...
